KING Polyweave

KING Polyweave is a double-laminated, woven polypropylene sheet designed for temporary floor and surface protection on construction sites. Its water- and dust-resistant surface shields floors from damage during the build, while remaining easy to clean up once work is complete.

Key Benefits

- Water and dust resistant
- Anti-slip surface for on-site safety
- Durable, reinforced woven construction
- Cost-effective temporary weatherproofing
- Easy clean-up after construction

WATER RESISTANCE

LIGHTWEIGHT

ANTI- SLIP

RECYCLABLE

Main Applications

- General floor and surface protection during construction
- Temporary on-site weatherproofing
- Renovation and building sites requiring large-area ground cover
