KING Stair Edge Protection

KING Stair Edge Protection is a felt-backed PP honeycomb board engineered for heavy-duty stair tread protection. It offers excellent load-bearing capacity and impact resistance, with one side laminated in a protective fabric layer for enhanced surface protection during construction and renovation.

Key Benefits

- Great load-bearing and impact resistance
- Felt-backed surface for enhanced stair tread protection
- Water-resistant and easy to wipe clean
- Reusable across multiple construction stages

STABLE STRUCTURE
LIGHTWEIGHT
WATER RESISTANCE
IMPACT RESISTANCE
ANTI- SLIP
RECYCLABLE

Main Applications

- Stair treads and steps during construction and renovation
- Apartments, hotels and office tower fit-outs
- High-traffic staircases requiring temporary protection
